EDUCATION

B.Tech in Computer Science and Engineering (E-Commerce Specialization)

CGPA: 7.74

VELLORE INSTITUTE OF TECHNOLOGY

2022 – 2026

TECHNICAL SKILLS

- **Software Testing:** Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Test Case Design, Test Execution, Bug Reporting
- **Testing Lifecycle & QA Concepts:** SDLC, STLC, Retesting, Root Cause Analysis, Quality Assurance
- **Programming Language:** Python
- **Database Testing:** SQL, Data Validation, Database Testing
- **Professional Skills:** Attention to Detail, Problem Solving, Communication, Team Collaboration

PROJECTS

LLM Q&A System for AtliQ Tees

dec 2025

[GitHub Repository](#)

- Built a natural language Q&A system over business data stored in MySQL using Google gemini, Hugging Face embeddings, LangChain, and ChromaDB.
- Designed the UI in Streamlit and implemented few-shot learning to improve query accuracy and user experience, automating analytics for store managers.
- **Skills:** LLMs, LangChain, Hugging Face, Google gemini, MySQL, Streamlit, Vector Search, ChromaDB, NLP.

MediBot AI – Medical Chatbot using LLM and RAG

Aug 2025

[GitHub Repository](#)

- Engineered an LLM-powered medical chatbot to provide context-aware responses to health-related user questions using a modern chat-based interface.
- Processed medical PDFs with LangChain and PyPDF, transformed unstructured text into searchable chunks, and created embeddings using Hugging Face models.
- Integrated Pinecone vector database for semantic retrieval, enabling efficient knowledge search and improved relevance in generated responses.
- Connected frontend, backend, and AI pipeline using Flask APIs, creating an end-to-end RAG application for healthcare information support.
- **Skills:** Python, Flask, LangChain, OpenAI, Hugging Face, Pinecone, PyPDF, HTML, CSS, JavaScript, dotenv

WhatsApp AI Agent using n8n (Cloud)

Aug 2025

- Developed a cloud-based WhatsApp AI agent using n8n to automate real-time user interactions.
- Integrated WhatsApp Business Cloud API and webhooks for seamless message processing and delivery.
- Utilized OpenAI API with memory to generate context-aware conversational responses.
- Designed a scalable workflow with conditional logic for efficient message routing and easy integration with external tools.
- **Skills:** n8n (cloud-based workflow automation), WhatsApp Business Cloud API for messaging integration, OpenAI API for AI-driven responses, Webhooks for real-time data handling, LangChain-based AI Agent with memory for contextual conversations, and conditional logic for workflow control.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** — [AWS](#)
- **SQL Programming** — [LinkedIn Learning](#)
- **Generative AI** — [IBM](#)
- **Generative AI with Azure OpenAI** — [Udemy](#)
- **HTML, CSS, and JavaScript for Web Developers** — [Coursera](#)
- **Modeling and Analytics for Supply Chain Management** — [NPTEL](#)
